The eCadet programme seeks to develop the entrepreneurial capabilities of students who aspire to become innovators and business leaders.

Category	Description	eCadet Points
Groom	To develop and refine business ideas through mentorship, monitoring, and structured training. Students engage in continuous improvement and validation of their ventures while building entrepreneurial competencies and formalizing their startups.	0
Ideation	To inspire entrepreneurial thinking and encourage idea generation. Activities in this stage expose students to the startup ecosystem and help them explore problems worth solving through bootcamps, sharing sessions, and early-stage competitions.	1
Scale	To support the growth and expansion of student ventures with real market traction, funding opportunities, and investor engagement. Activities focus on commercialization, scaling operations, and presenting to potential users or investors.	0
